Coursera / Microsoft

Fundamentals of Data Visualization with Tableau
Coursera / UC Davis

STRENGTHS

- Analytical rigor
- Adaptability
- Working under pressure
- Attention to detail

Data & BI Analyst
Python | SQL | Power BI | Tableau

PROFILE

Data & BI Analyst, Master's in Business Analytics (2026), with hands-on experience at Genpact and Telus: cleaning large data volumes, tracking KPIs and SLAs (98% accuracy) and optimizing processes (15% reduction in average processing time). Skilled in SQL, Python (Pandas), Power BI and Tableau. Comfortable with financial data, I aim to turn data into dashboards and recommendations that support decision-making.

PROFESSIONAL EXPERIENCE

Data Operations & Risk Management Analyst • *2025 — 07/2026*
Genpact — Bucharest, Romania

- Daily cleaning and structuring of large data volumes; identified trends, anomalies and risk patterns to inform internal policy decisions.
- Tracked key performance indicators (KPIs) and service level agreements (SLAs), maintaining a consistent 98% accuracy rate.
- Evaluated existing processes and made recommendations that contributed to a 15% reduction in average processing time.
- Performed root-cause analysis on complex, escalated cases, working with the Quality and Management teams.

Financial Operations & Billing Analyst • *05/2025 — 09/2025*
Telus — Bucharest, Romania

- Monitored and verified cash flows (customer payments, refunds, credit card transactions) with a high level of accuracy.
- Processed banking operations and financial transactions daily; resolved billing disputes under pressure.
- Updated financial information and customer accounts in strict compliance with confidentiality standards.

Internship — Sales Advisor • *06/2023 — 11/2023*
Banque Zitouna — Bizerte, Tunisia

- Managed customer accounts: opening, updating and verifying bank account information.
- Took part in loan application processing: building credit files and verifying supporting documents.
- Processed check operations (deposits, compliance verification) according to internal banking procedures.

EDUCATION

Master's in Business Analytics • *2024/2026*
Bucharest University of Economic Studies (FABIZ)

- Data Visualization & BI: Power BI, Tableau — designing automated dashboards.
- Machine Learning & Programming: developing predictive models and automating statistical workflows with Python.
- Strategic Decision-Making: applying quantitative methods to real-world financial problems.

National Bachelor's Degree in Economic Sciences — Economic Engineering and Finance • *2024*
Higher Institute of Management of Bizerte (ISG)

- Financial modeling: analysis and mathematical modeling of economic trends and business performance.
- Risk management: study of financial markets to assess investment risk and optimize portfolio management.
- Business economics: micro/macroeconomic indicators and their impact on financial strategy.
